CBL - Cannabicyclol *	< LOQ	n/a	0.00030	_____

The results marked by * relate to non-accredited activity.

Units and abbreviations: % w/w = weight percent, LOQ = the limit of quantitation, ND = not detected, n/a = not available.

The results given herein apply only to the sample as received. Expanded Uncertainty was calculated using coverage factor k = 2, corresponding to a double standard uncertainty and characterizes the interval value in which it is possible to expect the real value with a probability of 95%. This is stated according to the ISO/IEC Guide 98-3.
